Seattle Central College | Seattle, WA   *March 2019*
- Associates in Business

SKILLS

Javascript | React | CSS | NodeJs | SQL | PostgreSQL | Axios | Express | Cors | Git | Github | PGAdmin |
Sequelize | AWS | Postman | Heroku | Firebase | Adobe Creative Suite | Figma

PROFESSIONAL EXPERIENCE

Freelance Web Design | Albuquerque, NM   *January 2023 - present*
Web Developer / Freelancer / Software Engineer
- Designed elegant and compelling web pages for clients using Figma and Canva to lay the groundwork to build functional and beautiful websites
- Consulted with clients about their tastes and desires around their website to better understand how to serve my clientele
- Crafted animations and stock photos according to client brand to allow their web presence to be cohesive and on message
- Formulated functions using JavaScript by analyzing problem requirements, identifying key inputs and outputs, determining logical steps, and applying appropriate programming constructs to product efficient and scalable solutions
- Developed collaboratively with clients to deliver agreed upon designs and made designs come to life using the React framework and implementing logic and functionality where it was needed
- Implemented responsive design using CSS and media queries, while keeping a mobile first mentality, to efficiently develop websites to be responsive and dynamic on any device

Devmountain | Lehi, UT   *August 2022 - December 2022*
Web Developer / Software Engineer (student)
Shiny Pokemon Checklist Version 2 - [Github Repo](#) | [Demo](#) | [Link to site](#)
React | JavaScript | HTML | CSS | Axios | Express | Cors | NodeJs | SQL | Dotenv | BcryptJS | JSON Web Tokens | SWAL2 | Sequelize
- Reimagined the original idea for a Shiny Pokemon Checklist and executed version 2 to be more functional and complete while keeping the core concepts of intuitiveness and cohesiveness very much alive to give users a well rounded experience
- Designed logos, loading animations and UX/UI to work around a central theme while using CSS media queries to allow the website to be as responsive as possible giving users a superb experience no matter their device
- Integrated a PostgreSQL database that was meticulously designed to store data in the most efficient way possible in order to create a streamlined back-end
- Formulated queries using SQL and the Sequelize ORM that combined data from many tables and created dynamic data output in order for users to check their progress of how many Pokemon they have obtained against how many Pokemon there are
- Implemented packages such as bcryptJS and JSON Web Tokens to provide login functionality to the website to not only allow users to create personal accounts but to hash and save users passwords securely and allow for ease of use when logging back in on trusted devices
- Redeveloped concepts from the original to be more robust and appealing by using the React Framework while also adding new features in order to expand a grow the application

- Developed the back-end of the application with NodeJs to communicate with the database and facilitate all requests made by the front end smoothly and efficiently allowing the application to stand independently

The Shiny Pokemon Checklist - [Github Repo](#) | [Demo](#)
JavaScript | HTML | CSS | Axios | Express | Cors | NodeJs
- Developed a website in order for Pokemon players to track their progress collecting shiny Pokemon in a fast and intuitive manner
- Designed and styled the website with excellent responsiveness and with UI/UX at the forefront of consideration
- Discovered multiple approaches to constructing the app and narrowed down the most efficient way to move forward
- Debugged extensively in order to squash any persistent problems with the website
- Utilized a JSON database and the nodemone package in order to simulate a server and database on your local machine
- Integrated Axios to send requests to the back-end and send data from the JSON database to the front end

Premier Cleaning ABQ | Albuquerque, NM   *April 2020 - August 2022*
Estate Manager/ House Cleaner
- Founded Premier Cleaning ABQ by taking on clients independently to better serve myself and my community as well as become a small business owner
